

- Software developed using this approach requires a substantial amount of pre-work and planning.
 - OOP code is difficult to understand if you do not have the corresponding class documentation.
 - In certain scenarios, these programs can consume a large amount of memory.
 - Not suitable for small problems.
 - Takes more time to solve problems.
-

8) What are the differences between object-oriented programming and structural programming?

It follows a bottom-up approach.

It follows a top-down approach.

It provides data hiding.

Data hiding is not allowed.

It is used to solve complex problems.

It is used to solve moderate problems.

It allows reusability of code that reduces redundancy of code.

Reusability of code is not allowed.

It is based on objects rather than functions and procedures.

It provides a logical structure to a program in which the program is divided into functions.

It provides more security as it has a data hiding feature.

It provides less security as it does not support the data hiding feature.
