

There are two types of cohesion, i.e. High and Low.

- High cohesion is associated with several required qualities of software including robustness, reliability, and understandability.
- Low cohesion is associated with unwanted qualities such as being difficult to maintain, test, reuse, or even understand.

High cohesion often associates with loose coupling and vice versa.

33) Give a real-world example of polymorphism?

The general meaning of Polymorphism is one that has different forms. The best real-world example of polymorphism is a person that plays different roles at different places or situations.

- At home a person can play the role of father, husband, and son.
- At the office the same person plays the role of boss or employee.
- In public transport, he plays the role of passenger.
- In the hospital, he can play the role of doctor or patient.
