

RSA is short for Rivest-Shamir-Adleman algorithm. It is mostly used for public key encryption.

45) How many layers are in TCP/IP?

There are basic 4 layers in TCP/IP:

1. Application Layer
 2. Transport Layer
 3. Internet Layer
 4. Network Layer
-

46) What is the difference between TCP/IP model and the OSI model?

Following are the differences between the TCP/IP model and OSI model:

Full form of TCP is transmission control protocol.

Full form of OSI is Open System Interconnection.

TCP/IP has 4 layers.

OSI has 7 layers.

TCP/IP is more reliable than the OSI model.

OSI model is less reliable as compared to the TCP/IP model.

TCP/IP model uses horizontal approach.

OSI model uses vertical approach.
